

# Risky Behavior Prediction

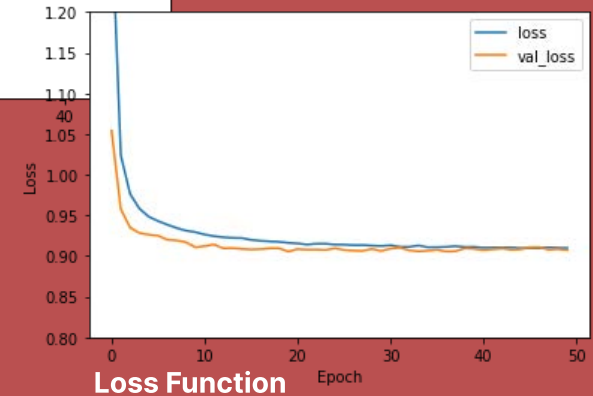

Gender  
Ethnicity  
School  
Scenario

## Data Training

### Model

fully connected neural network

“ Adolescence is a period of **heightened vulnerability to risk taking** because of a disjunction between novelty and sensation seeking (Steinberg, L. (2004)). ”

Intervention

Treatment

Education

## Reflections

- New data for analyzing **the current trend**?
- A larger sample size for **more representative results**?
- Better ways to prompt for **intuitive responses**?
