Proportion Completed and Clicks

Completion of Game based on Clicks

Ages 12

- higher performance
- less clicks taken to complete compared to 13 and 14

Ages 14

- lower performance than other ages
- comparable to 11 year olds
- what is up with this trend?

Clicks on Events

Events and Clicks

It seems that divided by the age groups, the challenge stack event has the most clicks and that 12 year olds struggle the most on it. Older demographics clicked less, but they also did not complete the game as much as compared to the previous game.

Strong resistance to drug ≠ Good decision making

Higher S5 mean scores mean lower resistance to drugs. Individuals who self-reported to have a higher resistance to drugs have similar performance as those with low resistance .
